

greyeye technology

Greyeye Technology is established as a leading provider of independent stock auditing software systems. Founded in 1999, Greyeye's continued success is built on its commitment to providing the best technological and business solutions to many types of stocktaking and hospitality businesses. Our systems are designed to operate on industry standard platforms and offer robust, secure and comprehensive solutions to real business needs.

Our expertise in providing state of the art, customer focussed software, has led to successful and enduring client relationships, which in turn has led to many new applications being developed for professional stocktakers, hotel chains, event catering companies, councils, pubs, clubs and breweries.

Significant efficiency gains have been realised by my clients as a result of using *CellarManager* and *StockManager*

Mr Nigel Cole FILSA,
Stocktaker for Thistle Hotels

The most comprehensive system on the market with an impressive development program utilising modern applications.

John Thorne,
Managing Director, Thorne Son & Clarke

StockManager is a very effective tool in the management of our liquor and the system support is first class.

Steve Winchcombe,
Group Liquor Manager, Compass UK Leisure

StockMaster 

STOCK AUDIT
AND CONTROL

StockMaster

The Revolutionary Integrated Food and Beverage Stock Audit & Control system

unique flexibility

StockMaster is a family of Windows™ based stock auditing software programs that are highly configurable in design to suit many hospitality environments. It is currently in use with a large range of clients from individual professional stocktakers to large multinational companies.

overview

StockMaster consists of several integrated components:

- **StockManager**
The core application, installed on a laptop or desktop, which provides an efficient stock audit and control/management system with interfaces to the other *StockMaster* applications and third party systems.
- **StockMate**
Software application that runs on a mobile hand held data collection terminal (HHT).
- **CellarManager**
For use by operator with central purchasing of stock and stock distribution to bars. Links to *StockManager* for data transfer.
- **Report Viewer**
An application offering easy access to *StockManager* reports for Head Office management.
- **RetailManager**
A stocktaking application designed for retail stocktaking utilising data capture on an HHT.
- **AccountsManager**
Bookkeeping application for small hospitality organisations.

in use by

- Professional stocktakers
- Clubs and sports stadia
- Breweries and pub companies
- Event catering companies
- Hotels and leisure centres
- Councils and universities

in more detail

StockManager

StockManager is a highly configurable application that includes:

- quick and accurate cash-to-stock reconciliation
- single and multi-bar operation
- easy to use interface – integrates both food and beverage components
- comprehensive suite of tailorable stocktaking reports focused on product and overall business performance
- extensive analytical and group reports offering financial and sales trend analysis
- connectivity to third party in-house systems is available on an individually tailored basis to fit specific business needs
- remote communications facility for data transfer between systems
- continual development program

StockMate

StockMate is an application for use with an HHT, utilising:

- product code or bar-code scanning for product identification
- dynamic addition of products and locations
- fast data transfer to *StockManager* system
- on-screen and printable report of count audit trail

CellarManager

CellarManager is an efficient operational tool for clients operating a cellar-based environment. This application is easy to use and offers a comprehensive suite of reports. Data transfer to *StockManager* is fast and efficient saving time during the stocktaking process.

ReportViewer

Reports generated from *StockManager* can be saved in small file format for electronic transfer to client's head office where they can be viewed on demand using *ReportViewer*. This valuable client management facility is further enhanced with simultaneous display of multiple reports.

RetailManager

A multiple HHT application, with bar code scanning, designed to access till data and complete an independent stocktake.

AccountsManager

A comprehensive bookkeeping application specifically designed for the licensed trade for use up to VAT return level. Ideal application for the professional stocktakers who wish to provide this service to their clients.

fully supported products

Moving to *StockMaster* products is not a leap in the dark. After-sales support is vital when implementing a new system, and in order to give you complete peace of mind, we will:

- supply and install all necessary software and hardware as required
- train you in all aspects of the system
- provide free-of-charge technical and software support for the first year, available by phone, email or fax. (On-site service available at extra cost.)

In this way we ensure that your system is implemented as quickly and efficiently as possible whilst maintaining full behind-the-scenes support as you start using *StockMaster* products.

frequently asked questions

Can *StockMaster* make use of my client data?

Yes. Specifically tailored software enables migration of most client data to *StockManager* and the ability to convert individual sites as required avoids the 'big bang' scenario.

What is the easiest way to get support?

As well as the telephone helpline, we provide a modem and software which allows you to access on-line support.

What about updates or upgrades?

Minor application enhancements are available on CD free of charge for the first year. Upgrades are available at extra cost, also on CD.

What happens to support at the end of the first year?

After the first free year, software support will be charged annually and will continue as before.

We currently use reports specific to ourselves. Is *StockManager* likely to be able to duplicate these?

Yes. *StockManager* is highly configurable making it suitable for many different business environments and needs. We would be happy to advise on specific requirements and help you configure your system accordingly as part of the training course we offer. This configurability of reports is just as applicable to all other *StockMaster* products.
